Prosecution is reopened due to a new ground of rejection.

The following is a quotation of the appropriate paragraphs of 35

U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-12 and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/92157. There is no “description support” in parent application S.N. 10/305400 for the limitation of a rotational speed of 2000 rpm to 8000 rpm. Accordingly the earliest effective filing date which can be accorded the instant claims is April 14, 2004, and WO 01/92157 is properly available as prior art under 35 USC 102 (b). WO 01/92157 discloses a rotational speed of 2000 to 8000 rpm on page 2, second to the last paragraph.

Claims 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is indefinite as to what the relationship is between the barium sulfate and the wetting or dispersing agent. For example, it is indefinite as to whether the coating of the coated barium sulfate would be required to be the wetting agent or dispersing agent.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1754

Claims 14-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" in the original specification for a particulate, coated barium sulfate "comprising a wetting agent or a dispersing agent".

Claim 6 is allowed.
